

Remy moved its European headquarter to Miskolc, Hungary

Miskolc, March 2017 - As a further step towards a centralized and more harmonized workflow Remy relocated its European operation to Miskolc, Hungary from Belgium. The process started in 2016 and compiled of several phases to ensure smooth and thorough transition ending in March 2017. With this major step the company is able to intensify its transportation, financial and operational efficiency, thereby it can provide better service for its customers.

The relocation involved both the financial department and the management, although the company's central sales offices remained in Belgium and in Germany. Remy operates manufacturing sites in Miskolc, Hungary and in Menzel Harb, Tunisia, two warehouses located in Belgium and in the United Kingdom, together with a distribution center in Hungary, supporting the company in providing fast and professional customer service.

“Being successful in multiple locations requires coordinated planning and execution. Moving the European headquarter to Miskolc gives us a better understanding of our customers’ needs in every aspect. We are able to observe closely every step of our operation and implement a more structured approach in Europe.” – said Zoltán Király, President and Executive Director of Remy Europe.

About Remy
