

## Remy has started to test new heavy duty products in its new test labour

Miskolc, June 2017 - Remy, one of the global leaders of the automotive aftermarket, has begun the testing of its new heavy duty starter products. The process takes place in the testing laboratory, which was opened in May 2017.

Remy launches two product lines for heavy duty starter aftermarket. From June Remy offers equivalent product line of Bosch HXF product family and Mitsubishi M90 product family.

“Remy is always looking for new market segments where we can increase our presence and the heavy duty aftermarket is definitely one of them. Launching these new product lines is a significant step. We have already manufactured and validated the products. The zero series has already been shipped to a customer, now we are starting to work on the extensive market introduction.” – said Zoltán Király, President and Executive Director of BPI Group Europe.
