

Remy is one of the driving forces of the world's automotive industry, specializing in production and refurbishment of alternators, starter motors and other automotive parts. With more than 120 years of experience and knowledge, the company manufactures and remanufactures alternators and starters for premium automotive brands all over the world, also offer a broad range of brake calipers and steering products, making the company a global leader in the automotive aftermarket.

BPI Group Hungary Kft. (formerly Remy Automotive Hungary Kft.) started its operation in 1999 in Miskolc, and now has more than 500 employees in its 17.000 square meter plants. Its primary activity is remanufacturing alternators and starter motors for light, medium, heavy and off-highway vehicles. A significant portion of the European market is served by the facility in Miskolc. The Central European Distribution Center opened in 2016 operates as warehousing and distribution site of rotating electrical parts, brake calipers and various steering parts.

Given the company's wide range of products and various customers Remy can offer thousands of different products. This type of diversity provides complex, exciting experience for employees instead of monotonous, mechanical movements.
