

## Remy opened its Central European Distribution Center

Miskolc, January 2017 - Remy, one of the global leaders of the automotive aftermarket, opened a new distribution center in Miskolc, Hungary. The Central European Distribution Center operates on more than 10k square meter as warehousing and distribution site for rotating electrical parts, brake parts and various steering parts.

“Remy is constantly improving its services and manufacturing processes. We are committed to provide high quality to our customers. Having warehouses in Belgium and in the United Kingdom we felt the necessity to open a modern and innovative distribution center in Central Europe too. Through our three sites we can provide fast and efficient service to our customers.” – said Zoltán Király, President and Executive Director of Remy Europe.

The company’s new distribution center serves 160 customers worldwide from Central and Eastern Europe to Australia and Middle-East. Its current capacity is 80k finished product distribution in 5500 warehouse location, while in 2017 the company expects to realize around 500k product distribution.

### About Remy
