

Remy opened its new testing laboratory in Miskolc, Hungary

Miskolc, May 2017 - Remy opened a new testing laboratory in Miskolc, Hungary. The company decided to setup a laboratory in Miskolc hard by its manufacturing plant, which represents a significant step in the company's centralization strategy.

"Remy started its operation in 1999 in Miskolc. Besides the manufacturing plant the company moved the European headquarter to the Hungarian city this year, also opened its Central European Distribution Center. We decided to open a testing labour close to the manufacturing plant so we can maximize the overall efficiency." – said Zoltán Király, President and Executive Director of BPI Group Europe.

The testing laboratory handles the testing process of starters, generators and all of these components in its 350 squad meter area. The new testing labour is capable to make all of the necessity testing measures through its HD simulator, nitrogen simulator, hot-dwell cabinet and other testing facilities.
