

## Remy to strengthen business relations at ReMaTec 2017

Amsterdam, June 2017 - The international remanufacturing industry met once again in Amsterdam for ReMaTec 2017 in June. Remy as one of the global leaders of the automotive aftermarket participated at the event to showcase its Reman capabilities and to promote their Gold and Smart concepts launched at Automechanika Frankfurt last year.

The internationally recognised event served as the perfect platform for Remy to introduce key products and underline plans of constantly improving services and manufacturing processes. The company presented the new brake products that will be launched during the winter of 2017/18 and provided a clear overview of its existing and future product portfolio to new and existing customers.

Remy has also made a strong step forward on local business opportunities with major market players. The company's aim was perfectly aligned with the event's main message on facilitating valuable connections and supporting discussion between market players, that made Remy's presence a huge success and a valuable contribution in improving business relations.

### About BPI Group Europe

BPI Group Europe is one of the driving forces of the world's automotive industry, specializing in the production, distribution and remanufacturing of premium automotive parts under the Remy brand name.
